## Technical Project Manager

12 Years 3 Months

(+91) 7042237778

saini0110@gmail.com

## Profile Summary

As a highly skilled Technical Project Manager, I bring a wealth of experience in Java, React.js, Angular, and Node.js development, coupled with a strong foundation in CI/CD pipelines, GitLab, and cloud platforms like Azure and AWS. I have a proven track record of successfully managing full-cycle software projects, ensuring timely delivery, high-quality results, and seamless integration. My expertise in Unit Testing and Automation Testing ensures robust, scalable applications, while my leadership capabilities drive collaboration across cross-functional teams to meet business objectives efficiently. In addition, my Google Project Management and Scrum Master certifications reinforce my ability to lead Agile transformations, optimize delivery processes, and align technical execution with business strategy.

## Key skills

## Education

B.Tech/B.E., 2009

Punjab Technical University (PTU)

## Work Experience

Aug 2024 - May 2025

Technical Project Manager

Builder.ai

Technical Project Manager with 12+ years delivering scalable web products across React.js, Angular, and Node.js. At Builder.ai, led **enterprise-grade** web application initiatives using **Studio Pro**, managing complex, large-scale implementations for **Enterprise customers**. Drive end-to-end execution, architecture, delivery while enforcing Agile best practices and CI/CD (GitLab) for reliable, high-velocity releases. Bridge business goals and engineering execution to ship on time, within budget, and to quality standards on cloud (AWS, Azure).

- Delivered enterprise web applications on **Builder.ai's Studio Pro** platform, overseeing discovery, solution design, sprint execution, and go-live for large customers.
- Led cross-functional squads (FE React/Angular, BE Node.js, Java, QA, DevOps) to ship large-scale, secure, and compliant features on AWS/Azure.
- Implemented GitLab CI/CD with automated testing, reducing release risk and improving deployment frequency.
- Drove Agile ceremonies (planning, stand-ups, reviews, retros) and stakeholder comms to maintain scope, quality, and budget alignment.

May 2020 - Jan 2024

Full Stack Technical Project Manager at Arena Software New Zealand based

## Arena Software

- Hands-on experience in coding, Testing, Implementation/Maintenance Support in PHP and MySQL/PDO.
- Conducting technical risk planning. Performing code reviews and unit test plan reviews.
- Leading and guiding the team towards developing optimized high quality code deliverables.
- Continual knowledge management and adherence to the organizational guidelines and processes
- Even Managing a Team of Developers.

Oct 2018 - Mar 2020

Senior Tech Lead

Vcommission Media

1. Team and Project Management 2. Api integration 3. AWS ServerManagement 4. Web Interface Designing. 5. Web Development on PHP and related frameworks.

Jul 2017 - Sep 2018

Senior Technical Lead

Grazitti Interactive

Grazitti Interactive | Sr Team Lead | July 2017 to Sep 2018  
(<https://www.grazitti.com/>)

Project ::- Communities of Apttus / Square / SAP

Team Size : 17 Members

Reporting officer :: Alok

Technology used: Lithium cloud based community platform.

Responsibilities:

- Built and scaled **enterprise** community platforms for **Apttus, Square, and SAP**—all big **enterprise** clients with stringent security, compliance, and SLA requirements.
- Planned execution and optimized workload distribution across modules; delivered to aggressive timelines with measurable quality gates.
- Translated business requirements into actionable technical designs; provided hands-on technical guidance and code reviews.
- Maintained daily client reporting, risk/issue logs, and stakeholder alignment to keep scope, budget, and quality on track.
- Instituted rigorous security and confidentiality practices; shipped releases with **zero known vulnerabilities**.

Mar 2015 - Jun 2017

Team Leader Operations

Wunderman International

Microsoft.com (95 locales) | Enterprise Client

- Orchestrated end-to-end homepage updates across 95 country/locale sites for Microsoft— a large enterprise client—optimizing work distribution, SLAs, and throughput.
- Translated fast-moving/ambiguous asks into clear requirements and executable backlogs; prioritized by impact and risk
- Provided hands-on technical guidance (CMS workflows, HTML/CSS/JS, localization/i18n, accessibility), proactively unblocking the team.
- Reported daily to client stakeholders with status, risks, and next steps; maintained strong alignment and quick escalation paths.
- Enforced security-by-default practices—peer reviews, secret handling, least-privilege access, linting/SAST—ensuring no vulnerable code shipped.
- Standardized runbooks/checklists to streamline releases and ensure consistency across regions.

Enterprise Migration Project — Ford.com → Adobe Experience Manager (AEM)

Led a large-scale migration from legacy KMS/CMS to Adobe Experience Manager, covering content modeling, component strategy, and CI/CD

enablement.

- Planned and executed phased cutover with governance, audit trails, and rollback paths; automated content transforms and validations.
- Drove performance, accessibility, and SEO baselines from day one; coordinated cross-functional teams (content, dev, QA, infra, security).
- Delivered a secure, low-risk transition with measurable gains in editorial velocity and site reliability.
